Motion Launches New Solutions to Improve Tablet PC Mobility and Adaptability

New solutions offer multiple docking and charging options for Motion Tablet PCs

AUSTIN, TX – Dec. 14, 2009 – Motion Computing®, a leading provider of integrated mobile computing solutions, today announced new peripherals designed to improve the mobility and adaptability of its tablet PCs. The ReadyDock™ and external battery charger for the J3400 offer multiple options for storing and charging, while the auto/air AC and DC adapter provides the ability to charge all currently available Motion Tablet PCs from multiple power sources.

J3400 ReadyDock and External Battery Charger

Now available for the J3400, the ReadyDock can be configured to store and charge five, ten or 20 J3400 Tablet PCs, ensuring the devices are available and ready to use for mobile field professionals. With locking cabinets, the ReadyDock offers the most efficient way to store, charge and secure multiple tablets.

An external battery charger is also now available for the J3400. The small size of the external charger and the interlocking design to accommodate multiple devices support mobile field professionals by enabling rapid charging in a variety of locations.

Auto/Air AC and DC Adapter

The auto/air AC and DC adapter for the J3400, C5, F5 and LE1700 provides the flexibility to charge Motion Tablets from standard wall, automobile or airplane outlets. The integrated USB port provides added flexibility, enabling users to charge multiple devices, such as mobile phones or digital cameras. With a light, compact design, it is easily carried throughout the work day.

“Motion continues to offer peripheral solutions that support highly mobile workflows,” said Mike Stinson, vice president of marketing for Motion. “These latest products are developed specifically to help users compute throughout the workday, from the jobsite to the hospital.”

Pricing and Availability

The J3400 ReadyDock, external battery charger and the auto/air AC and DC adapter are available now. Visit the [Motion accessories](#) page to learn more about these solutions and all available accessories for Motion products. Motion Tablet PCs are sold by authorized Motion resellers and distributors worldwide, for more information visit the [partner page](#).

About Motion Computing

Motion Computing is a leading provider of integrated mobile computing solutions, combining world-class products with services customized for the unique needs of target vertical markets. The company's enhanced line of rugged tablet PCs, mobile point of care solutions and accessories are designed to increase mobile productivity while providing portability, security, power and versatility.

Motion Mobility Solutions offers a complete portfolio of products, services and support that helps ensure a successful mobile deployment for increased productivity, reducing project risk while delivering a more rapid return on investment. For more information, visit www.motioncomputing.com.
