Motion Named Microsoft 2010 United States OEM Partner of the Year

Leading provider of rugged slate tablet PCs recognized for industry leadership, customer experience and dedication to tablet PC marketing programs

AUSTIN, Texas – July 20, 2010 – Motion Computing®, a leading provider of integrated mobile computing solutions, announced today that it was recognized as the Microsoft® United States Original Equipment Manufacturer (OEM) Partner of the Year. Motion® was recognized for its premiere customer experience, successful tablet PC-focused marketing programs, commitment to the Windows® 7 tablet PC computing experience and consistent achievement of revenue goals.

“Motion is well recognized as a leading innovator in performance-driven enterprise tablet PC solutions that embrace the enhanced features in Windows 7,” said Eddie O’Brien, VP Microsoft OEM. “We’re happy to recognize the company as our US OEM Partner of the Year, and look forward to continuing our partnership as we focus on the innovations to come in this rapidly growing and exciting industry.”

All Microsoft 2010 Partner of the Year award winners and finalists were chosen from nearly 3,000 entries submitted from around the world, and selected based on their dedicated use of Microsoft technologies to provide customer-focused computing solutions.

“Motion is excited to be named as US Partner of the Year based on our mobile computing solutions designed for the enterprise environment,” said David Altounian, CEO, Motion Computing. “We’re seeing increasing demand for solutions that fit seamlessly into an enterprise IT environment, and offer the powerful performance and operability needed to help mobile workers maximize productivity.”

Motion Tablet PCs are designed for mobile workers across vertical markets that require robust computing solutions that can withstand often harsh working environments. Rugged and sealed for protection against dust, moisture and other elements, the devices offer both durability and mobility. Available with a host of integrated features, Motion Tablet PCs offer hot-swap battery solutions to help deliver uninterrupted productivity, as well as a digital camera option for on-site documentation, available Gobi™ 2000 mobile broadband and industry-leading display technology for a wide range of mobile uses.
