Motion Announces New Peripherals, Solutions to Improve the Manageability, Mobility and Usability of its Rugged Tablet PCs

AUSTIN, Texas and ATLANTA – March 1, 2010 – Motion Computing®, a leading provider of integrated mobile computing solutions, today announced from the 2010 Annual Healthcare Information and Management Systems Society (HIMSS) Conference & Exhibition, new peripherals and solutions for its tablet PCs. The new ReadyDock™ with Ethernet and Mobile Dock with built-in lock for the Motion C5 mobile clinical assistant (MCA) and F5 Rugged Tablet PC offer more storage, charging and management options while the Motion Medical Dictionary streamlines documentation processes for healthcare professionals.

ReadyDock with Ethernet

The ReadyDock is a complete solution for charging, storing and securing the Motion C5 MCA and F5 Rugged Tablet PC. Now available with Ethernet, the ReadyDock enables IT to connect, control and manage the tablet PCs while they are stored throughout the day or overnight. Tablets automatically connect when stored, enabling direct 10/100 Mbps remote connectivity for efficient management. The ReadyDock can be configured to store, charge and connect five, ten or 20 tablet PCs, offering a convenient, secure, space-saving solution for healthcare environments. The ReadyDock is manufactured by **Advanced Technical Support, Inc.** and used around the globe to support tablet PCs use in hospitals, field service and more.

“Adding an integrated Ethernet connection to the ReadyDock provides significant value to the solution’s usability in healthcare,” said Dan Hurd, co-founder of Complete Tablet Solutions, a value-added reseller of Motion Tablet PCs, services and solutions. “Now IT can continuously update and manage the devices without interrupting clinical workflows, efficiently ensuring that the tablets are continuously charged and ready for clinician use.”

Mobile RAM Dock with Lock for Added Security

Lightweight and thin, the RAM® Mobile Dock for the C5 MCA and F5 Rugged Tablet PC can be mounted to cabinets, poles, walls and vehicles for convenient access to the mobile devices. Now available with a built-in lock for added security, the RAM Mobile Dock also offers full port replication (VGA, USB 2.0, and Ethernet), charging capability, as well as vibration protection and durability for mobile environments. The RAM Mobile Dock is manufactured by **RAM Mounting Systems**, the industry-leading mounting and docking provider specializing in the development of custom mounting and docking solutions specifically designed to support the mobility and adaptability of rugged computing solutions.

Motion Medical Dictionary

The Motion Medical Dictionary in English, available for the Motion C5, F5 and J3400 Tablet PCs, installs 250,000 words into the tablet input panel for rapid, accurate recognition of handwritten healthcare terms. This allows clinicians to get the same productivity improvements that the tablet input panel provides for standard terms by ensuring that common medical terms are quickly recognized enhancing clinical documentation, efficiency and productivity.

Available Now

The Motion Medical Dictionary, the Mobile Dock and the ReadyDock are now available from Motion's network of value-added resellers and distributors worldwide. For more information visit or to find a reseller near you visit Motion's [accessories page](#) or [healthcare solutions page](#).

About Motion Computing

Motion Computing is a leading provider of integrated mobile computing solutions, combining world-class products with services customized for the unique needs of target vertical markets. The company's enhanced line of rugged tablet PCs, mobile point of care solutions and accessories are designed to increase mobile productivity while providing portability, security, power and versatility.

Motion Mobility Solutions offers a complete portfolio of products, services and support that helps ensure a successful mobile deployment for increased productivity, reducing project risk while delivering a more rapid return on investment. For more information, visit www.motioncomputing.com.
