

The **Motion CL900**

The Tablet PC that's Built for Business

Motion[™]

CL900

Motion CL900 | Built for Business

The CL900 is the latest tablet PC from Motion®, recognized as the premier provider of enterprise-ready tablet PCs. Our knowledge, passion and total dedication to producing the absolute best tablets built for business is second to none. We are exclusively and relentlessly focused on improving the productivity of mobile workers. The CL900 is the result.

The Motion CL900 is a durable, lightweight and powerfully equipped tablet PC purposefully designed, developed and built for business. The CL900 helps mobile users to be more efficient and effective – no matter where work takes them.

Ready to Work

Every Motion CL900 comes out of the box ready to work. Weighing just 2.1 pounds¹, the CL900 helps every user to work faster, smarter and more effectively, providing the capabilities, applications and ergonomic ease of use mobile workers need to be more productive in today's decentralized work environments.

Durable from the Inside Out

The CL900 is designed for the challenging conditions highly mobile workers face every day and is far more durable than any other comparably priced tablet. Built around an internal frame for structural rigidity, the CL900 is MIL-STD-810G and IP52 tested for durability.²

Superior Display

The CL900's display is as tough as it is brilliant. Equipped with Corning® Gorilla® Glass, the resilient display material renowned for its lightweight strength and durability, the CL900 is the first 10-inch rugged tablet that enables both multi-touch and active stylus³ input on a display.

Extended Battery Life

The CL900 works up to a full eight hours on just one battery charge⁴, so workers don't have to waste valuable time re-charging. In addition, Motion's industry-leading charging technology provides a work-to-charge ratio that reduces downtime.

Dimensions
The Motion CL900 is thin, light and powerful.

Rainy or dirty conditions?
No problem.

Capture real-time info with integrated tools?
As much as you can handle.

Run multiple apps?
Anywhere. Anytime. All day long.

MIL-STD
810G

IP52

CPU Designed for Tablets

The CL900's Intel® Atom™ Z670 processor provides the ideal balance between power and battery consumption. As a result, the CL900 can run critical business applications, as well as deliver crisp, colorful HD video and graphics – all while providing up to eight hours of battery life.

Non-stop Connectivity

Mobile workers can't afford to be disconnected. That's why the CL900 offers a range of reliable wireless connectivity options to users worldwide. With the CL900, workers can connect in the way that best suits their needs, from integrated Bluetooth® to WLAN to Gobi™ connectivity for mobile broadband.

Enterprise Support and Service

Motion designs and delivers solutions built for business, which means we take support seriously. The CL900 was built to run on Windows® 7, so there's no need for IT to rework infrastructure, support a new OS, restrict manageability or sacrifice security. Enhanced security features include Trusted Platform Module (TPM) from Microsoft and Computrace® security and anti-theft software. Support for the CL900 is the same as for any other PC in the network.

Accessories to Meet Your Needs

Motion offers the accessories you need for configuring your CL900 to support your unique usage scenario. Designed for the standing worker, the CL900's optional countertop docking station includes expandability options with external ports supporting Ethernet connectivity and USB accessories including a full-size keyboard, mouse, printer or external display. Additional optional accessories include a carrying case and an active stylus for pen input.

The Motion® CL900 SlateMate™ with Magnetic Stripe Reader and Barcode Scanner

Capture data on the go with the CL900 SlateMate™, Motion's industry-first integrated expansion module that extends the capabilities of the CL900 Tablet PC.

The first in what will be a family of integrated expansion options for the CL900 Tablet PC, SlateMate with a magnetic stripe reader (MSR) and barcode scanner (BCS), transforms the CL900 into a mobile point-of-sale (MPOS) and data acquisition tool. Securely integrated into the internal frame of the CL900, SlateMate serves as a streamlined solution that doesn't require connections to third party devices.

The Motion® CL900

Actual size shown (Top)

The CL900. No Compromises.

It doesn't take a genius to understand that while some tablets are great for having fun, when it comes to the daily grind of real mobile work environments they just don't make the cut. That's where Motion delivers.

We don't compromise.

We don't stop at building a better tablet PC. We keep working until we build the best. The best design for users who work while standing. The best balance of weight and ergonomics. The best efficiency and extended battery life. The best, most resilient connectivity. Simply stated, we build the best tablet PC for business.

Features and Specs

Adaptable and Configurable

- Front and rear facing cameras
- Optional countertop docking station includes expandability options
- Multiple carrying solutions
- Convenient dual input (multi-touch and active stylus)
- Optional SlateMate™ with MSR and BCS⁵

CPU Designed Specifically for Tablet PCs

- Intel® Atom™ Z670 processor
- Provides balanced performance for enterprise apps
- Uses less power and provides longer battery life
- Runs Windows® 7 Professional for business integration

Lightweight and Highly Mobile

- Only .95kg (2.1 lbs)
- Up to eight hours of battery life
- Built-in wireless connectivity (mobile broadband with GPS, Bluetooth®, WLAN)

Durable Form Factor

- Meets MIL-STD-810G
- Works in challenging field conditions (IP 52 rated; water, dust and splash resistant)
- Standard Solid State Drive (SSD)

Resilient Display

- Delivers clear visibility even in bright sunlight
- 10.1" screen featuring HD 1366 X 768 resolution
- Added durability with Corning® Gorilla® Glass

¹ Weight represents approximate system weight. Actual system weight may vary depending on component and manufacturing variability.

² Tested by independent, third party lab to MIL-STD-810G and IP-52 specifications. Accidental damage not covered under standard warranty. Optional additional warranty protection available.

³ Active Stylus for pen input available as an optional accessory.

⁴ Battery life varies by configuration, applications in use, utilized features and operating conditions. Maximum battery capacity decreases with time and use. Motion battery life estimates based on MobileMark® 2007 performance testing.

⁵ The Motion CL900 SlateMate is available at the time of product purchase only and is not available separately.
