BENEFITS

Transforms any J-Series Tablet PC into a full-featured desktop computing and charging solution.

Features a convenient charging bay to ensure batteries are charged for a full day of computing while away from the office.

VESA holes compatible for mounting on a wall and the stand supports desktop use.

Motion J-Series Tablet PCs are rugged powerful all-in-one systems for field and office use that are ideal productivity tools for workers who compute and enter data while standing or walking.

The **FlexDock** transforms any J-Series Tablet PC into a full-featured desktop computing and charging solution. Unlimited viewing angles are provided to support charging, keyboarding and pen orientations.

External ports support an external monitor, RJ45 network connectivity and all your favorite USB accessories such as a full-size keyboard, mouse and printer.

The FlexDock also includes a charging bay to charge an additional battery which can be hot-swapped when the unit is docked.

Support for a universal lock slot is also provided for added security. AC Power Pack included.
