BENEFITS

A simple way to attach a
keyboard to the J3400 to achieve
the notebook functionality.

No need to have to carry the
weight of a keyboard for mobile
professionals that walk and
compute the majority of the time.

Keyboard opens and closes like
a notebook computer.

Keyboard lid protects keys when
closed.

The **Mobile Keyboard** easily converts the
J3400 from a mobile computer into the
notebook mode for sitting, desktop and
word-processing environments.

No need to carry the weight of a keyboard
while in the mobile mode of standing,
walking and computing.

Provides a comfortable user experience
through an ergonomic design with a full-size
keyboard, touchpad and palm rest.

The J3400 is a rugged powerful all-in-one system for
field and office use that is the ideal productivity tool for
field workers who compute and enter data while
standing or walking.

The J3400's adaptability makes it a great solution for
mobile professionals that stand, walk and compute
across a broad range of industries and job functions –
from doctors to inspectors to social workers in a wide
variety of environments.
