

Mobility - taking Soarian anywhere, everywhere with the Motion C5

"Few innovations have the potential to transform workflow, boost clinician productivity, yield savings in time and money, and help to improve patient safety. Soarian Clinicals, running on the Motion C5 brings information directly to the point of care."

Michael L. Westcott, MD, FACEP
Chief Medical Information Officer
Alegent Health Information Systems

Clinical Intuition

Equipped with the Motion™ C5, Soarian® Clinicals makes vital information accessible at the bedside, in the treatment room, operating room or anywhere in the hospital - wherever the clinician or patient goes, at any time. Bringing information to the point of care, the Motion C5 is a logical and powerful extension to Soarian Clinicals workflow and Healthcare Process Management technology - tools that help drive clinical processes according to standards of care defined by the hospital.

Innovative Technology in Your Hands

The Motion C5 represents a convergence of technologies that allows you to do everything you normally do during your shift such as administer medication, record clinical notes and take pictures using a single device. With Intel® Centrino® mobile technology and integrated high-speed wireless connectivity, the Motion C5 integrates key functions that clinicians require to be productive during the course of their day.

Soarian & the Motion C5 Deliver Unprecedented Outcomes

Highly Portable, Flexible Design

The combination of Soarian Clinicals and the Motion C5 lets clinicians access schedules and Electronic Health Records (EHR) at any time. With the Motion C5 you eliminate duplicate documentation, increasing the accuracy of your information while decreasing the potential for transcription and medication administration errors. The Motion C5 helps you confidently enforce the 5 rights of medication administration: right drug, right patient, right dosage, right route and right time.

Facilitate Seamless, Mobile Point of Care

Capturing all patient information in one secure and up-to-date record is fundamental to streamlining workflow and enabling advanced approaches to care, such as evidence-based decision support, quality management and outcome reporting.

Mobility with Soarian Clinicals and the Motion C5 takes process management anywhere, everywhere - at the point of care, with a single, lightweight mobile device.

Security Features with Patient Care in Mind

The Motion C5 has a number of healthcare-oriented security features that make it well suited for the demanding patient care environment. To ensure that only authorized users access sensitive patient data, use the biometric fingerprint reader or authenticate your badge with the RFID reader, which supports patient selection and verification in Soarian Clinicals*.

The Motion C5 helps you implement existing patient safety processes for infection prevention without slowing you down. A splash-proof seal helps decrease the risk of hospital-acquired infections. After use at the

bedside, the entire

system is easily wiped off to disinfect helping to maintain a sanitary healthcare environment.

About Motion

Motion Computing is a mobile computing and wireless communications leader, combining world-class innovation and industry experience so professionals in vertical industries such as field sales and service, healthcare and government can use computing technology in new ways and places.

About Siemens Medical Solutions

Bringing together a unique set of innovative medical imaging, clinical diagnostics, healthcare information technology, management consulting, and related services, Siemens Medical Solutions helps healthcare providers achieve improved clinical workflow, gains in productivity and efficiency, and higher levels of quality, accuracy, and safety.

C5 Product Specifications

Processor/Cache	• Intel® Centrino® mobile technology with the Intel® Core Solo Processor U1400 (2MB of L2 cache, 1.20GHz, 533MHz FSB)
Operating Systems	• Windows Vista™ Business • Microsoft® Windows® XP Tablet PC Edition
Chipset	• Intel 945GM
Display	• 10.4" XGA TFT LCD (1024 x 768) • View Anywhere® option • Intel Display Power Saving Technology (DPST)
System Memory	• DDR2 533MHz SDRAM memory • Base configuration of 512MB • Upgradeable to maximum 1.5GB at point of purchase
System Storage	• 1.8" Hard Disk Drive (HDD) with 30GB or 60GB capacity • PCI bus master enhanced IDE • Supports Ultra ATA 66/100
Communications	• Integrated Intel® PRO/Wireless a/b/g • Optional Atheros 802.11 a/b/g card available • Integrated Bluetooth®
Dimensions	• 10.0" x 10.0" x .95"
Weight	• 3.3 lbs. ¹
Battery	• Lithium-ion standard battery with 40Whr capacity

¹Weight represents approximate system weight measured with a 40Whr battery. Actual system weight may vary depending on component and manufacturing variability.

*Available in future release.
