Motion™

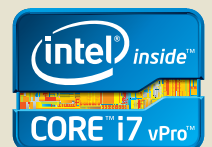

F5v

C5v

Motion Computing®, recognized as the premier provider of purpose-built tablet PCs configurable with up to the Intel® Core™ i7 vPro™ processor¹, was the first company to deliver true point-of-care computing with the Mobile Clinical Assistant (MCA). Our knowledge, passion and total dedication to producing the absolute best tablets built for healthcare is second to none. We are exclusively and relentlessly focused on improving the productivity of mobile health professionals and our full range of tablet PCs offers a solution for every healthcare environment.

Instantly capture patient information at the point of care. Access schedules and EMRs. View patient history, diagnosis and treatment. Identify patients, medications and assets. Collaborate with the entire patient care team. Motion has the most complete, robust and integrated line of tablet PCs designed to improve workflow efficiencies for your healthcare team.

LET MOTION TABLET PCs HELP STREAMLINE YOUR WORKFLOWS AND ENHANCE PATIENT CARE.

MOTION C5v and F5v TABLET PCs

Compact. Lightweight. Easy to disinfect. The Motion C5v and F5v Tablet PCs were designed specifically for healthcare environments in partnership with Intel® Health and based on input from thousands of clinicians worldwide. Rugged, powerful and fully sealed to ensure compliance with infection control protocols, the C5v and F5v thrive in demanding healthcare environments. Available with up to the Intel® Core™ i7 vPro™ processor, the C5v and F5v provide powerful performance at the point of care. Offering a hot-swap battery feature and enhanced remote management capabilities, both clinicians and IT personnel can feel confident that patient data can be entered simply and securely, without ever leaving the patient's side. And now the F5v is available with a dual-input display to support both capacitive two-finger touch and high-resolution digitizer pen.

MOTION J3500 TABLET PC

Performance Driven and Flexible. The Motion J3500 is ideal for healthcare professionals who need powerful performance in a mobile device. Whether receiving patients in the ER, making house calls or checking patient records, the J3500 enhances productivity by providing performance and flexibility at the point of care. The available touch screen option makes scrolling through long documents or navigating the task bar quick and easy, while the digitizer enables clinicians to complete forms, capture patient signatures or input handwritten data securely. Available with up to the Intel® Core™ i7 vPro™ processor, the J3500 offers the performance to run virtually any application and the mobility to take technology to the point of care.

MOTION CL900 TABLET PC

Ultra-mobile, yet durable. The Motion CL900 is a lightweight and purposefully equipped tablet that's ideal for healthcare providers who need to increase productivity, streamline workflows and ensure precise adherence to institutional protocols and government regulations. With the CL900, clinicians benefit from technology that can deliver non-

stop access to the critical, real-time information and applications they need to reduce errors, simplify compliance and enhance patient care. At just under 1 kg² (2.1 lbs) and featuring the Intel® Atom™ Z670 processor, the CL900 offers an ideal balance of performance, power and mobility.

FLEXIBLE INTEGRATED PERIPHERALS

Whether you need a barcode scanner to enhance medication administration and patient identification, an integrated digital camera to capture images into the Electronic Medical Record (EMR) or built-in Wi-Fi®, Bluetooth® or Gobi™ connectivity to keep caregivers connected to the entire patient care team, Motion Tablet PCs can be configured to your specifications. And with the latest Intel processor technology, Motion Tablet PCs run multiple enterprise applications seamlessly.

Motion Tablet PCs. No Compromises.

It doesn't take a "genius" to understand that while some tablets are great for having fun, when it comes to the daily grind of real clinical work environments they just don't make the cut. That's where Motion delivers.

We don't compromise.

We don't stop at building a better tablet PC. We keep working until we build the best. The best design for users in demanding clinical environments. The best balance of weight and ergonomics. The best efficiency and extended battery life. The best integrated transaction and documentation modules to support any mobile workflow. The best, most resilient connectivity solutions. Simply stated, we build the best tablet PC for healthcare.

Let the full line of Motion Tablet PCs help you streamline your workflow and enhance patient care.

Motion solutions save time, reduce errors and ensure that the most up-to-date information stays at clinicians' fingertips throughout all stages of the care delivery process.
