

Powering Productivity in the Energy and Utilities Industry with Motion Tablet PCs

Motion® recommends Windows® 7

Powerful, Full-featured
Rugged J3500 Tablet PC

Ultra-light
Rugged CL900 Tablet PC

Integrated, Powerful and Portable
Rugged F5v Tablet PC

Whether field service crews are responding to a customer service request, reading a meter or reacting to an emergency, mobile solutions enable them to increase efficiency and customer satisfaction. However, energy and utility organizations must identify the right solution for their mobile workforces. Technicians must regularly deal with the elements and are often faced with exposure to extreme heat, rain or dust that require a rugged device.

With these concerns in mind, many are turning to rugged tablet PCs that provide continuous access to important information with the added benefit of durability to withstand the outdoor elements. And Motion Tablet PCs with up to the Intel® Core™ i7 vPro™ processor* provide top-tier performance, longer-lasting battery life and the latest integrated wireless technology.

For more information on Motion Tablet PCs, please visit www.MotionComputing.com or call your local Motion reseller.

MANY UTILITIES COMPANIES ARE ENHANCING FIELD OPERATIONS AND IMPROVING PRODUCTIVITY BY USING MOTION'S UNIQUE LINE OF TABLET PCS TO:

- Improve response times and productivity with real-time access to updated scheduling information
- Enhance customer service and speed issue resolution times with remote access to ticket information and parts availability
- Maintain ongoing collaboration to better manage the complex environment of field personnel, crews, vehicles and tools
- Better utilize technicians with real-time access to project status, technician availability and project completion times
- Enable service workers to resolve problems on site with access to issue resolution information
- Minimize paper-based processes to help reduce project delays and increase employee productivity
- Reduce billing latencies by electronically capturing customer signatures and immediately submitting invoices after each work order
- Improve communications with field workers to ensure technicians are on site within the required period of time and equipped to resolve service emergencies

"MOTION TABLETS HAVE CONSIDERABLY REDUCED THE PAPERWORK AND DELIVERED REAL PRODUCTIVITY GAINS."

SYDNEY WATER

"DATA CAN NOW BE RETURNED TO CLIENTS ON A DAILY BASIS, WHERE THE SAME PROCESS OF DELIVERING THE DATA WITH OUR PAPER-BASED MAPS COULD TAKE MONTHS."
