

About Motion Computing Services

Motion Computing offers industry-leading, flexible services and support programs that enable customers to acquire, protect and service Motion Tablet PCs. From purchase to IT service and support, Motion programs ensure that your business stays up and running.

Motion Computing Financial Services

Motion Computing offers specialized leasing programs for commercial accounts, healthcare businesses, educational institutions, and federal, state and local government organizations. A dedicated team of finance professionals are ready to assist you with every step of the financing process.

MotionGuardSM by Safeware[®]

Motion Computing offers MotionGuard by Safeware as a complete protection plan designed to safeguard your Tablet PC investment from the unexpected causes of computer downtime. MotionGuard covers most repairs or even replaces your Motion Tablet PC and accessories caused by many kinds of losses, including accidental damage, vandalism, theft, natural disasters and fire.

Motion Warranties

To feel confident in your investment, Motion offers a standard, 1-year limited warranty on Motion Tablet PCs, the Motion FlexDock docking station and memory modules. Motion also offers 2-year and 3-year extended warranties.

All other Motion Computing approved and tested accessories are protected by a 90-day limited warranty.

About Motion Computing

Motion Computing – a mobile computing and wireless communications leader in vertical markets such as healthcare, field sales and service, government and education – combines world-class innovation and industry experience. Motion's Tablet PCs and related ultra-mobile products enable people to use computers in new ways and places.

Marketed through an experienced international reseller network and directly through its Web site, each Motion product is built to customer specifications. The company's award-winning products and accessories are designed for users who need a combination of true mobility, versatility and power.

THE MOTION M1400 TABLET PC

Business today occurs far beyond the walls of the typical office. More than ever, we live and work in a digital world and are part of a highly mobile workforce. That's why professionals – across industries such as healthcare, field sales and service, government and education – are taking the unique features and ultra-mobile design of Motion Tablet PCs into more places than ever before.

The M1400 Tablet PC, the latest addition to Motion's award-winning Tablet PC series, is designed to work the way you do. M1400s provide the industry's best integration of Intel® Centrino™ Mobile Technology and Intel Celeron® M technology, the advantages of digital ink and the full functionality of Microsoft Windows XP. The M1400 combines the mobility of a PDA, the versatility of a laptop and the power of a desktop into a single, easy-to-use device.

Healthcare practitioners can access real-time patient information from the bedside while making their rounds. On a sales call, field sales representatives wirelessly stream multimedia presentations onto the large display, access real-time product availability information and gather customer signatures to close a sale. Educators and students use digital ink to annotate homework, create class presentations or draft lecture notes. There has never been a more powerful tool for being truly productive in today's expanding workplace.

M1400 in pure slate form.

All Motion Tablet PCs put the features of Microsoft® Windows® XP Tablet PC Edition to work for you, inviting you to experience a truly paperless world. Take notes, annotate documents or presentations, send handwritten emails and even navigate the web – all with the simple stroke of a pen. And the M1400's unique Speak Anywhere™ audio technology delivers advanced clarity in recording and playback of your audio notes, without the need of a headset.

The M1400's striking 12.1" display is enhanced by wide viewing angles and provides a remarkably similar feel to pen on paper. Motion's innovative View Anywhere™ display option offers advanced viewing capabilities, particularly for those who work outdoors. The Ambient Light Sensor technology uses a built-in sensor to automatically adjust the display brightness, maximizing battery life and optimizing viewability.

Used as a slate when mobile or in full-function desktop mode with a keyboard and wide array of accessories when docked, the M1400 facilitates every type of work scenario. And simple, one-handed grab-and-go docking makes it easy to switch between work environments without interruption.

M1400 with FlexDock, DVD and USB Mobile Keyboard.

PURE

mobility.

versatility.

power.

The Motion Tablet PC – there has never been a more powerful tool for being truly productive in today's expanding workplace.

At about 3 pounds, Motion's ultra-thin and ultra-light slate design enables you to work comfortably while sitting, standing or walking. Integrated wireless networking and Bluetooth® technology deliver seamless high-speed wireless connectivity that provides untethered access to network data, applications and accessories.

With advanced mobility comes the need for enhanced data security. The integrated fingerprint reader and software-based security solutions on the M1400 deliver biometric fingerprint authentication, preventing unauthorized access to sensitive data as well as convenient, single-step global password management.

Equipped with high-capacity lithium ion batteries, the M1400 is designed to keep up with the demands of your day by providing long battery life, quick charge times and warm-swapping capability. LED battery gauges give you instant information regarding your remaining battery life. Motion's innovative features and design make mobile computing effortless – on the road, in the office and everywhere in between.

M1400 with Hardtop Keyboard.

M1400s feature the power of Intel Centrino Mobile Technology to support your most demanding computing needs or Intel Celeron M technology for mainstream power at an exceptional value.

The M1400 is a powerful computing platform that will grow with your changing needs. High capacity hard drives with up to 60GB of disk storage and up to 2GB* of memory allow you to scale your system to meet your unique computing needs. IEEE 1394 and USB 2.0 connectivity deliver high-speed data transfer to a wide variety of external devices, including DVD/CD-RW drives, cameras or portable printers.

Motion Tablet PCs deliver truly optimized performance and unique flexibility all while streamlining office workflow, minimizing errors, decreasing costs and increasing productivity.

*Available on M1400 Centrino models only.
